DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. The method according to claims 24-27 of formula IV, wherein X is C. This method is classifiable in class 514, subclass 277.
- II. The method according to claims 24-27 of formula IV, wherein X is N. This method is classifiable in class 514, subclass 279.

The inventions of Groups I-II are separate and patentably distinct because there is no patentable co-action among them and a reference anticipating one member will not render another obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, a search of the two groups designated above would impose an undue burden upon the examiner, and restriction for examination purposes as indicated is proper.

A telephone call was made to Warren Cheek on December 13, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is requested to elect a specifically disclosed species of the invention to be examined for search purposes.
